
1st reference.

The door mirror half way through the car you are parking behind.

Then 1 full turn of the steering wheel.

Looking in the left door mirror the kerb will disappear at the bottom.

The right door mirror. The kerb is just under the door handle.

Full lock the steering wheel to the right.

When you are level with the car in front and also you can look in the let mirror to see if you are level with the kerb.

1 and a half turns to the left will straighten the wheel up.
